

Rescue DAN M1

All Daniamant Lifejacket lights are designed to deliver, as a minimum standard, the 0.75cd output specification and 8 hour duration required by IMO SOLAS regulations.

The light is a single compact flashing unit. It is manually activated by rotation of the light glass. Easily fitted with two different backing plates, one to go over a thin strap and one to go over a 5cm belt, the sleeves on the bottom of the lights allow straps to go through for retro-fitting on jackets not prepared for light attachment. Lights can also be supplied with a pull ring arrangement for survival suits.
